

ON-SITE ATTENDANCE POLICY

Effective 10/25/21

- All guests aged 2 and older are required to wear a mask that completely covers the nose, mouth and under the chin except when eating or drinking. Masks must be worn throughout our campus including interior and exterior areas.
- Before entering the Temple Israel campus, all guests aged 5 and older are required to present documentation of one of the below, noting only tests conducted by a laboratory or physician's office will be accepted, not at-home tests.
 - A negative COVID-19 PCR test result (sometimes referred to as a molecular test) taken no more than 72 hours (3 days) prior to the on-site attendance, or
 - A negative COVID-19 Antigen test result (referred to as a rapid test) taken no more than 24 hours (1 day) prior to the on-site attendance, or
 - Full vaccination status defined as the completion of the final dose administered at least 14 days prior to the on-site attendance.

Documentation can be shown in-person or emailed to tioffice@temple-israel.com at least one hour prior to the attendance and can be in printed or digital form, and must clearly state the name of the attendee, date of test or vaccine, type of test performed or brand of vaccine, and the negative test result (if a test documentation.)

- Matching photo identification must be presented for those 18 years and older.
- We urge those who currently or have experienced any flu-like symptoms within 14 days prior to attendance, or have been in contact with anyone diagnosed with COVID-19 in this timeframe, to please stay home. Symptoms include:
 - Fever of 100.4°F or higher
 - Cough
 - Shortness of breath or difficulty breathing
 - Sore throat
 - New loss of taste or smell
 - Other flu-like symptoms

There is always a risk of exposure to COVID-19 in any public place where people are present. While Temple Israel cannot eliminate all risk, we do attempt to minimize risk for our guests including by having hand sanitizing stations and requesting social distancing whenever possible. However, our efforts do not replace important safety practices that individuals should adhere to including vigilant hand hygiene and staying home when symptomatic.

These policies are subject to change. Please check our website for any updates or contact us if you have any questions.
